

Pipe Hangers

Pipe hangers are used to support a sprinkler piping system from the building structure. Two or more listed components may be required to form a complete hanger assembly. The specific components required depend upon the type of building construction and the pipe size.

C-Type ClampsA type of clamp that is used to provide a load carrying connection to the flange of a building structural element, usually by use of a jaw and setscrew combination. It also provides for the attachment of a threaded rod.
