

The Chocolate Fountains of Bellagio's Hotel

Bellagio is a luxury hotel and casino located on the Las Vegas Strip, Nevada, USA. One of its most notable features is an 8-acre (32,000 m²) lake between the hotel and the Strip, which houses the Fountains of Bellagio, a large dancing water fountain synchronized to music.

Inside, adjacent to the huge atrium area is the world's largest *chocolate* fountain, where hundreds of gallons of liquid chocolate flow gracefully within a sculpture that stands twenty-seven feet high. Six-pumps move three kinds of chocolate (dark, milk and white) at a continuous 95°F. Shurjoint 316 Stainless Steel Couplings & Fittings were chosen to construct this project due to their high-quality and local availability. Fittings and couplings are cast in seven grades of stainless steel, including exotics such as 254SMO and Super-Duplex.
