

Northeast Georgia Medical Center

Located in North East Georgia, the 134-bed hospital brings services modeled around the programs of excellence at NGMC Gainesville to the Greater Braselton community. These include heart services, vascular services, orthopedics, neurosciences, cancer treatment, surgery, emergency services, obstetrical services and NICU care. The 119-acre Braselton campus is also home to Medical Plaza B, which houses several specialty physician offices, a resource center and cardiopulmonary rehabilitation, and Medical Plaza 1, which houses an urgent care center, imaging center, endoscopy suite, outpatient lab and therapy services and more than 20 physician offices.

Approximately \$80,000 pieces of Shurjoint grooved product were used on this facility capable of expanding to 350 beds by its design.
