

Children & Women's Hospital

This project began on the new Teck Acute Care Centre, a \$676 million project in 3 phases to build "an eight-story facility, approximately 640,000 sqft in size. Designed to LEED Gold standard, his facility includes medical and surgical inpatient units, an emergency department, medical imaging and procedural suites, a hematology/oncology department and a pediatric intensive care unit.

Shurjoint AWWA series products were used on this project's domestic water supply systems.
