

The Exchange

This 31-story, \$240 million, 1.85 million sqft office project is built as one of Canada's most sustainable office towers, and is the conjoined redevelopment of the old stock exchange tower – a neo-gothic heritage building that opened in 1929. The Exchange is the 2nd tallest office tower to achieve Leadership in Energy and Environment Design [LEED] Platinum.

Shurjoint products were used on The Exchange's chilled, condensed, domestic, and heating water supply systems.
